Ivy Applied Data Science Internship (Python)

The **Ivy's Internship Program** is designed to help learners apply Python to a real-world data science case study.

During the internship, you will work through different stages of a real analytics project:

1. Data understanding
2. Data preparation
3. Exploratory analysis
4. Model development
5. Business presentation of results

Program Guidelines

1. **Internship Structure:** The internship has been divided into various stages of the data science project.
2. **Task Assignment:** Tasks for each day will be posted at 9:00 AM on the scheduled date as given below.
3. **Submission Timing:**
   - The submissions must be done based on the calendar below.
   - The submission time is 9 am of the given submission date.

Task	Task Details	Task Date	Submission Date
1	Data upload, Check quality of data, Data Preparation	18 Mar 2026	20 Mar 2026
2	Missing value handling & Data processing	20 Mar 2026	22 Mar 2026
3	Feature engineering & Exploratory analysis	22 Mar 2026	24 Mar 2026
4	Model Development	24 Mar 2026	27 Mar 2026
5	Final PPT	27 Mar 2026	30 Mar 2026

4. **Submission Format**: Students must submit: A Python Notebook (.ipynb) containing their code and analysis. **PDF or Word files are not allowed.**
5. **Code Quality and Efficiency**: The emphasis should be on writing clean, logical, and efficient Python code. Avoid unnecessary steps or redundant code while solving the tasks.
6. **Individual Work:** Each student must submit their own individual work on Google Classroom. Any submission prepared in consultation with peers will be marked 0.

7. **Use of AI Tools:** The use of tools such as ChatGPT or other AI coding assistants is not allowed during the internship challenges.

8. **File Naming Convention:** Files must be named using the following format:
   FullName_DayNumber
   Example: Eeshani_Agrawal_Day1.ipynb

11. **Resubmissions and Late Submissions:** Resubmissions and late submissions will not be accepted.

12. **WhatsApp Communication Rule**: No discussion related to the tasks should take place with peers on WhatsApp while the internship tasks are active.

13. **Certification Criteria:** Students who successfully submit the final presentation will receive the certificate.
